

Redhawk Announcement Press Release

Redhawk Investments Group, LLC today announced the formation of the company. The company is engaged in real estate development to leverage the tremendous growth in the offshoring services in India and to create value by developing world class facilities to sustain that growth. The group conjoins the tremendous opportunity in the Indian real estate market and the need for financial services companies to develop a presence in India, in order to cater to local markets and develop the companies' global back offices.

The CEO of the company, Bipin Agarwal announced the launch in Colorado, where the company is incorporated. "Our vision is to create a company that can capture the growth of developing countries and bring that together to proven business models in developed nations".

The company has been formed by the founders who have over 40 years of successful history in the outsourcing, offshoring and real estate industries. Also the initial promoters of this concept have strategically put together an experienced management team that has intimate knowledge of trends in the offshoring industry, as well as significant comprehension of the workings in the financial services industry. The management team has deep political and real estate associations in India, which is crucial for the development of the infrastructure. To compliment that, the team has existing relationships in the US financial services industry putting us in a unique position to engage with the financial services company and provide them a roadmap for establishing an offshore center.

Bipin Agarwal, CEO of Redhawk Investments Group has a tremendous track record of creating businesses that generate huge returns for stakeholders and investors. He was a co-founder, Director, and Executive Vice President of the North American Operations at Tanning Technology Corporation. As a member of the company's operating committee and board, he participated in M&A activity, developed strategic business alliances, maintained analyst relationships, and helped take the company public in 1999. Mr. Agarwal has been an angel investor in business. He holds an M.S. in Computer Science from IIT in India, where he graduated as class valedictorian in 1985.
